General Information

Short summary

Greek bio-company, with a deep respect towards tradition and nature, is looking for suppliers of metal tin cans. The company already exports and imports to many countries and is looking for a supplier of sealed metal tin cans in small or medium sizes, colorful or not, to maintain the quality of their products. The desired type of collaboration is supplier agreement.

Full description

Established in 2018 in Komotini, the Greek company is a specialized unit dedicated to the cultivation and processing of organic herbs. It offers a wide range of high-quality signature herbal blends, available in small branded packages, private-label products, customized packaging, and beverages such as 100% natural, zero-calorie herbal teas and botanical syrups for sodas and cocktails.

Driven by a passion for nature and wellness, the company is committed to producing organic, beneficial, and flavorful herbs. Greek herbs are globally renowned for their exceptional taste, aroma, and nutritional value—as well as their diverse uses and therapeutic properties.

Sustainability lies at the heart of the company's operations. It is devoted to cultivating in harmony with nature, and actively promotes best practices in harvesting, sorting, and packaging—making high quality not just a standard, but a

shared value and expectation.

The company's mission is to deliver holistic botanical experiences that inspire people to embrace a healthier, more mindful lifestyle.

To support its commitment to quality and sustainability, the company is currently seeking sealed metal tin cans suitable for preserving its teas and herbs. These containers must ensure product freshness while aligning with eco-friendly practices. In this context, the company is looking to establish new supplier agreements with international partners.

Advantages and innovations

The company leaves a minimal footprint on the environment since the organic waste resulting from the production process is composted in its entirety, and all recyclable materials used, such as plastic, glass, paper, and packaging, are recycled. Regarding crops, the drip irrigation system is applied, consuming the smallest possible amount of water. Also, the company uses biodegradable, recyclable, or recycled materials specifically.

Technical specification or expertise sought

The company is looking for suppliers of metal tin cans.
